EDUCATION TO MAKE A LIVING

The development and enhancement of students' careers and their necessary education are the subjects of this selected bibliography on "Education to Make a Living." While the role of vocational education is stressed, the individual needs of students of all ages and the manpower needs of society are suggested. Also, some aspects of institutional and system response as they serve career needs are included. For balance and supplementary reading, it is recommended that the reader consult the two other bibliographies prepared in this series, namely "Education for Citizenship" and "Education to Make a Life," as the three are viewed as complementary.
